

# Accommodation in Cyprus

Cyprus is a major tourist destination generating a large percentage of its revenue from summer tourists yearly. With the aim of understanding the distribution of available accommodation facilities across the country, presented here is a map showing the distribution of accommodation facilities by type in Cyprus at the district level. Residential accommodation in form of apartments are represented as a choropleth map, while accommodation types that fall under the tourism sector (chalets, hostels, hotels, guesthouse, and motel), are presented in a pie chart, also categorized at the district level.
